

JOBU fruit clip

The JOBU fruit training/support clip: the easy way to keep stems in place!

JOBU fruit clips are used to keep canes and/or stems in place along horizontal wires.

JOBU fruit clips are secured as follows:

1. Attach one end of the clip to the wire
2. Put the stem and/or cane inside the fruit clip
3. Attach the other end of the clip to the wire

Fruit clips make sure that the stem or a cane with wa stem cannot fall over or get blown over.

JOBU fruit clips are used in various branches of the horticultural sector:

- **fruit production:** For keeping blackberry and raspberry canes in place and for keeping apple slips from leaning or blowing over.
- **rose production:** For keeping standard roses in place along a wire.
- **nursery sector:** For providing vertically growing trees and shrubs with the support they need to keep them from blowing over.

**The JOBU fruit clip:
makes it a snap to keep stems in place!**
