

# Danish trolley shelf support extensions

## **KUMA shelf support extensions and film supports: for reliable results!**

KUMA shelf support extensions and KUMA film supports are used on Danish trolleys to add another shelf (extra shelf supports) and seal in tall plants (film supports).

### **The KUMA shelf support extensions and film supports are secured as follows:**

1. **Shelf support extensions:** insert a shelf support extension into each of the 4 existing shelf supports so that an extra shelf can be installed.
2. **Film supports:** insert a film support into each of the 4 existing shelf supports so that film can be used to seal in taller plants.

KUMA shelf support extensions and film supports can be used in the horticultural sector in which both growers as well as auctions and exporters use Danish trolleys.

KUMA shelf support extensions and film supports are distinguished from other plastic shelf support extensions and film supports by the excellent quality of their plastic and their reliability in practical situations.
